Checkmk Conference #13

May 11–13, 2027
Munich, Germany

The future of IT monitoring is calling, become a part!

This resource turns the Checkmk Conference into numbers you can measure – the tangible ROI of the IT monitoring event of the year.

The Pitch

This conference isn't just an event, it's a dedicated **training session**. You'll get **hands-on experience** in areas like cloud-native monitoring and scaling Checkmk for enterprise environments, which can directly translate to a more reliable infrastructure and better performance.

By learning from Checkmk's own developers and top users, you'll gain insights that help avoid critical mistakes and optimize your current setup, ensuring your monitoring system truly supports your business goals.

The KPIs from #Conf12 2026

1800+
attendees from the global Checkmk Community

160+
diverse **companies** from A like Adobe to W like Wiener Börse AG

93%
gained a **better understanding** of Checkmk & **97%** left **inspired** to apply new features

45 hours
of expert-led, hands-on **workshops** covering 9 relevant IT (monitoring) topics

30+
top-tier **speakers** across 24+ technical sessions & case studies

What you'll bring back

Your attendance is a **direct investment** in hands-on skills, developer access, and proven architectures – insights you can't get from recordings.

Operational Efficiency & Modern Stack Expertise

Practical Knowledge You Can Apply: Proven configurations and practical insights from technical sessions and workshops, rated 4.2/5 for applicability.

Automation & Observability at Scale: Explore Checkmk 3.0, OpenTelemetry, Checkmk Relay, Synthetic Monitoring, and event-driven Ansible.

Risk Reduction & Strategic Planning

Resilience & Upgrade Safety: Proven approaches to high availability, zero-downtime updates, and security monitoring to protect critical systems.

Roadmap & Licensing Insights: First-hand insights into upcoming developments and editions for informed decisions on growth and budgets.

Valuable On-Site Connections

Direct Access to Developers & Architects: Bring your challenges to the Knowledge Fair for live demos and direct developer feedback (rated 4.8/5).

Learn from Industry Peers: Exchange experiences with fellow IT professionals and see how other organizations approach similar tasks.
