

# From discovery to integration: elevate your monitoring

May 21, 2025 - Live from Paulaner am Nockherberg, Munich

**Mathias Götze**  
Consultant  
ITeratio GmbH

**Stefan Novak**  
IP Network Operations  
Kabelplus GmbH

# Who is ITeRatio GmbH?

- ◆ Founded in 2001 by Rolf Assenmacher and Hardy Düttmann ([#CMKConf9: Monitoring of Very Large Network Infrastructures](#))
- ◆ Core competence is Network and System Management
- ◆ Checkmk (2012) Partner since 2014
- ◆ Award-winning Checkmk Gold Partner

## About Me

- ◆ Working for ITeRatio since 2017
- ◆ Scientist in particle physics before that

# Who is Kabelplus?

- ◆ Founded in 1978 as cable TV operator, First internet customer in 1997
- ◆ Implementation of Checkmk began in summer 2023
- ◆ Go-live in January 2024

kabelplus

## About Me

- ◆ Working at Kabelplus since 2003
- ◆ 10+ years experience with Checkmk

# Kabelplus Facts

**130k+**

TV customers

**123k+**

Internet Customers

**~300 Gbit**

Internet Traffic

# Kabelplus Checkmk Environment

4

sites

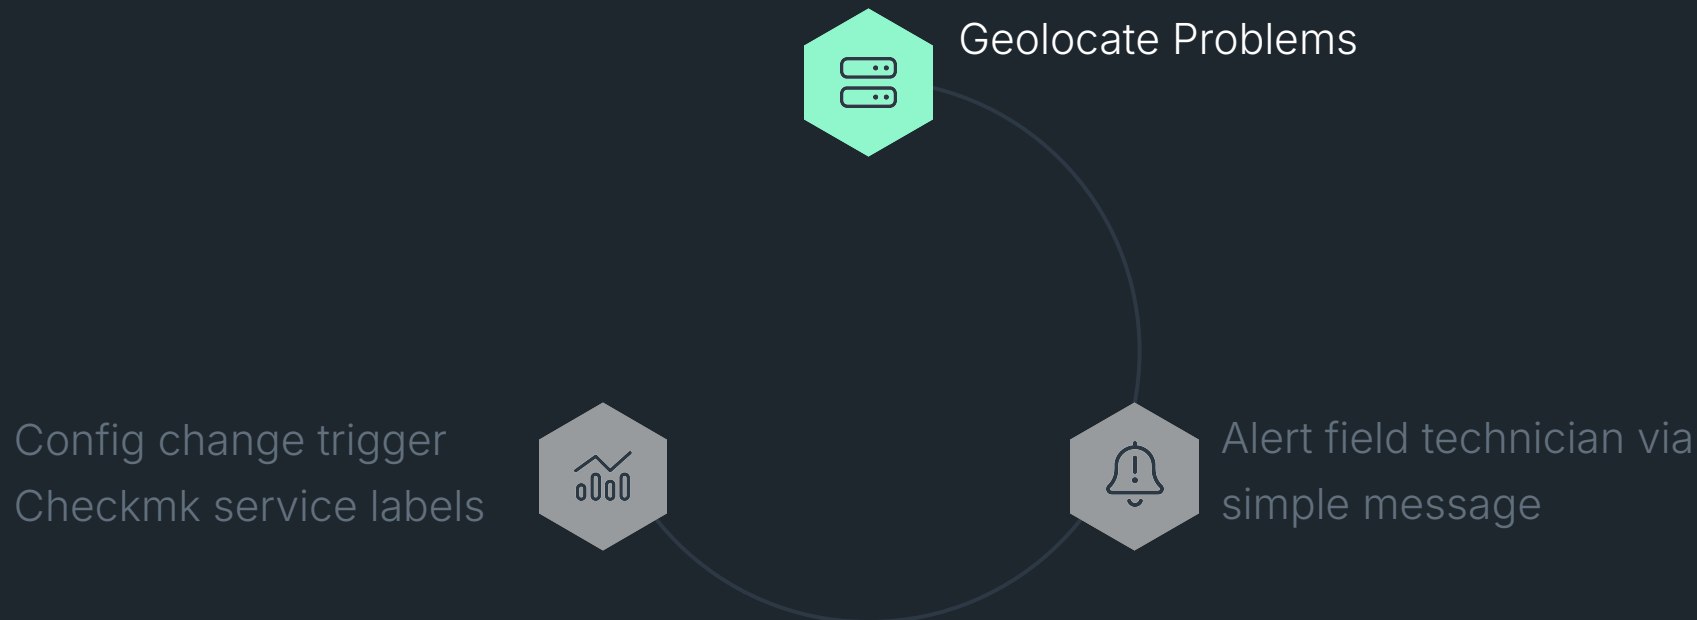

4,200+

hosts

100k+

services

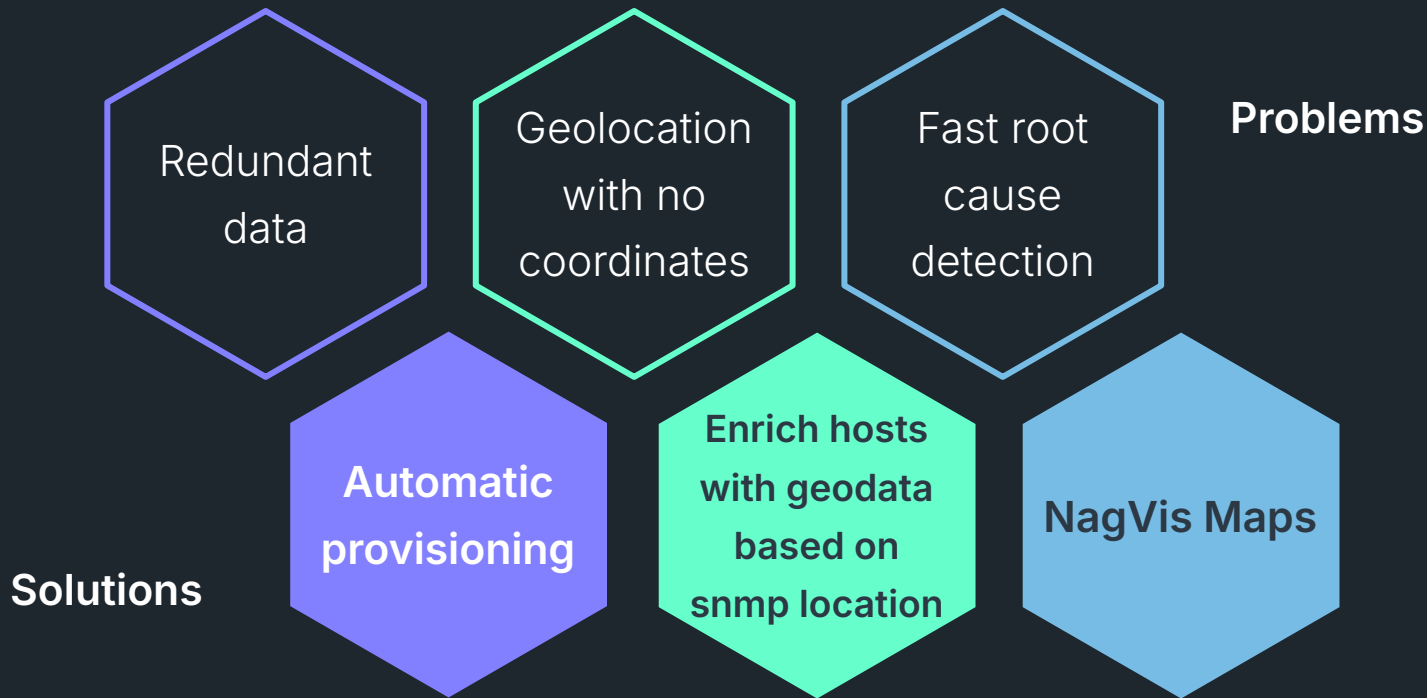

# Problems we are trying to solve

# Locate Problems?

How to get all the hosts

# Automatic Provisioning

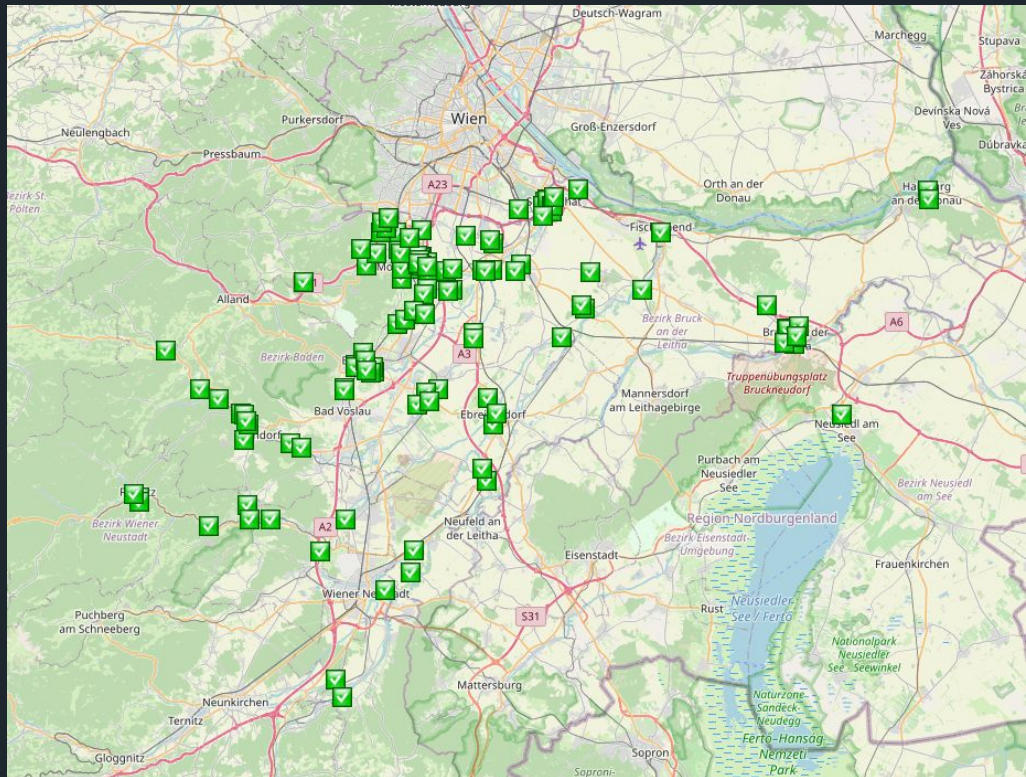

- 1 Provisioning via api from phpIPAM
- 2 Depending on device type, enrichment of host data via SNMP and phpIPAM
  - ⬡ Classification of devices based on SNMP (switch type etc.)
  - ⬡ Addresses, coordinates as Custom Host Attributes
  - ⬡ Addresses are converted to geo coordinates via Google Maps API
- 3 Each team receives information about incorrectly set attributes from phpIPAM

# Automatic Provisioning

- All Hosts with locations are also provisioned into NagVis.
  - NagVis Worldmap → automatic Sqlite
  - very accurate representation on the map
- Host groups to display the different types.
- Helpful for root cause analyses
- Update of addresses via HW/SW inventory data

# Problems we are trying to solve

Config change trigger  
Checkmk service labels

Geolocate Problems

Alert field technician via  
simple message

# Notification problems and solutions

# SMS Alerting

## Hardware

HWg-SMS-GW3  
SMS modems

## Notification

Develop  
notification plugin  
in order to work  
with API of modem  
and redundancy

## Monitor

Check status and  
parameters of  
modems and alarm  
if necessary

## Configuration

Next step to  
configure who is in  
charge, the  
easy way

# Extension to Notification Rules

Build your own configuration Website within Checkmk

- Hexagon icon **Dynamically** reads config
- Hexagon icon Extend Notification Plugin to work with Config file & **distribute** settings via scp
- Hexagon icon **Checks** marked users
- Hexagon icon "Send test" doing a **Fake Check** Result
- Hexagon icon Regular SMS via cron job
- Hexagon icon Support Checkmk 2.3/2.4 version
- Hexagon icon Maybe extend GUI a little more (automatic refresh etc.)

  
checkmk

  
Monitor

  
Customize

  
Setup

  
kplus

# Interface description

- Not manageable with switch port discovery rules
- Generate service labels based on interface description via livestatus
- Static labels for just text matching
- Keys with pattern matching
- >20k individual labels
- How to get them into checkmk?

```
pattern:
  ias: ([a-zA-Z0-9]+);.*:
  ignore_values: ["none", "null"]
  static_labels:
    ias: "yes"
  custom_keys:
    Customer: "\\1"
```

OK	Interface 06	≡ 📁	[ias:k1331d00;tags:KCPRI,HWAVM;name:;addr:7042 Antau, /-/-;ctime:2023-10-05T09:15:25;], (up), MAC: 60:FA:9D:1D:2C:5C, Speed: 1 GBit/s, In: 0.00 B/s (0%), Out: 0.00 B/s (0%)
OK	Interface 07	≡ 📁	[ias:p0042f00;tags:KCPRI,HWICOTERA;name:Kabelplus CARRIER DIENSTE;addr:7000 Eisenstadt, /-/-;ctime:2024-02-19T11:12:05;], (up), MAC: 60:FA:9D:1D:2C:5C, Speed: 1 GBit/s, In: 0.00 B/s (0%), Out: 0.00 B/s (0%)

# Labels and now?

20k Labels how to set them?

## Rules via API

Setting Rules via REST API

- ❖ Set individual Interface and Switch Port rules
- ❖ Service Labels

Not usable, as GUI is no longer responsive or transparent to new rules

→ No Solution

## Write own MK file in config directory

It is possible to write your own MK files with rule content

- ❖ Single File ~5 mb
- ❖ Core activation takes very long, we aborted after 5 minutes

→ No Solution

## Extend interface check

- ❖ Simple loading of labels from the text file
- ❖ Works with the standard discovery rules
- ❖ Labels text file must be present on all sites

# Extension of Interface Check

- Minimal extension of Interface library  
*(lib/python3/cmek/plugins/lib/interfaces.py)*
- Host name and interface name and new labels are there
  - Only a few modifications for updates

```
